Capacities of these numerous vehicle versions vary from 3,000 to 33,000 lbs. All vehicles are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest expanding lift truck company in the North American market, thanks to their reliability in maintaining a high degree of consumer service quality and optimum product functioning to all Doosan Infracore Forklift users. The U.S. lift Truck division stationed in Cleveland has a expert team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's original domestic lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a nationwide machinery expansion project. Initial product sales of this manufacturing equipment focused on large business communities, the armed services and on state-run firms. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Daewoo began the first domestic forklift business in 1967, and quickly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a situation of considerable growth of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to counter act competitive pressures in the US materials handling industry. This venture drastically expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a modern plant which helped launch the company for the fabrication of high end added-value goods suitable for export. In 1993, the company had a international sales network and started exporting models they had developed through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
