

## JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

While on their journey, John spent time talking to previous business associates whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered an infinite marketplace for a product that could quickly and safely elevate people in the air to accomplish upkeep and other building services.

Following their return from holiday, John set up a partnership with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty workers, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design elements of that original lift into existing versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fateful cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into many different international markets and continues to cultivate innovative machines to guarantee that customers are able to become safer and more resourceful within their workplace.
