Globally, Clark has one of the most outstanding dealer support networks. With over 550 locations globally, dealer representation in over 80 countries and 230 locations in North America, their high level of commitment to their clients predominates the material handling industry.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated lift truck industry. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark has a unrelenting goal to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing facilities. Also, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any environmental restrictions, thus placing them in a prevailing industry position.

Clark has chosen the system of "Lean Production" at all of its assembly facilities for the reason that this method is particularly economical and enables minimal use of resources. Established to guarantee maximum efficiency, this system is intended to discover and acknowledge the most effective ways for manufacturing facility management. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards improving product efficiency while minimizing costs. The contemporary value engineering agenda combines modern product development and delivers superior consumer support and service within the industry.
